TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Highlights.	3
1. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, April	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-April averages	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, April.	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, April . . .	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-April	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, March, with comparisons	14
7. Federal milk order Class I formula price information, April	18
8. Prices and economic indexes used in Federal milk order formulas to determine April prices, with comparisons.	20
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, April.	21
9a. Seasonal incentive fund excluded under various Federal milk orders, April.	21
Major order actions, April.	22

HighlightsAPRIL 1967

Producer Deliveries. A total of 126,073 producers delivered 4.3 billion pounds of milk to regulated handlers in 68 comparable markets during April 1967. This represents an increase of 1.2 percent above producer deliveries in April 1966. Average daily delivery per producer increased from 1,064 pounds in April 1966 to 1,138 pounds in April of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 68 markets decreased 5.2 percent from last year, to a total of 2.6 billion pounds for the month of April 1967. A major factor for this large decrease may have been the five Sundays occurring in April this year, as compared to the four last year. Very little milk is sold by handlers on Sunday. The average utilization percentage for April was 59 percent, down from 63 percent last year. Five markets showed an increase in the utilization percentage, 2 showed no change, and the remaining sixty-one markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 5.4 percent in the 68 markets for the month of April

Minimum Prices. The weighted average Class I price paid by handlers in the 68 markets for 3.5 percent milk was \$5.71 per hundredweight, 32 cents higher than the \$5.39 per hundredweight price in April 1966. Minimum Class I prices for April were higher in all 68 markets.

Producers in the 68 markets received a weighted average blend price of \$4.85 per hundredweight for 3.5 percent milk. This is 19 cents higher than the April 1966 blend price of \$4.66. Producer received higher blend prices in 62 markets, and a lower price in the remaining 6 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for April 1967 in 67 marketing areas are estimated to be about 2.1 billion pounds, 4.5 percent below such sales in April of last year. Complete March in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-April period for the 68 markets was \$5.87, 51 cents higher than the \$5.36 price in 1966. The 1967 weighted average blend price was \$5.16, 43 cents higher than the blend price of \$4.73 reported for this period in 1966 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first four months of this year, compared to the same period in 1966, producer deliveries for the 68 markets were up 0.9 percent, and deliveries used in Class I were down 3.0 percent. Data for the 68 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-April

Markets	Producer Deliveries			Deliveries used in Class I		
	1967		Change from 1966	1967		Change from 1966
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
68 Comparable markets 1/	16,311,039	+144,446	+ 0.9	10,519,831	-324,806	- 3.0
5 Non-comparable markets 2/	1,818,416	+1,358,449		1,113,768	+744,635	
73 All markets 3/	18,111,420	4/-273,418	- 1.5	11,621,578	4/-405,051	- 3.4

1/ Markets under continuous regulation since January 1, 1966, which have had no significant marketing area expansion.

2/ Upper Florida, Milwaukee, Southern Illinois, Central Illinois, and Sioux City.

3/ Excludes Sioux City.

4/ Includes 1,784,004 thousand pounds of producer receipts and 831,007 thousand pounds of Class I for the Chicago market, January-April 1966.

1/ Markets under regulation on January 1, 1966, and which have had no significant marketing area expansions. Excludes Upper Florida, Milwaukee, Southern Illinois, Central Illinois, and Sioux City.

2/ Class I plus Class II = 1,930,794 thousand pounds in 1967 and 2,060,838 thousand pounds in 1966; utilization = 51% in 1967 and 52% in 1966.

3/ Handlers regulated prior to the termination of the Chicago order, producer deliveries, 344,582 thousand pounds and producer deliveries used in Class I, 279,753 thousand pounds.

4/ Fewer than three handlers.

5/ Excludes Sioux City.

6/ Includes 1,784,004 thousand pounds regulated under the Chicago order.

7/ Includes 831,077 thousand pounds regulated under the Chicago order.

MAJOR ORDER ACTIONS, APRIL 1967

Amendments:

4 Markets - April 1 (32 FR 5250, 3/29/67).

Cedar Rapids-Iowa City
Des Moines

North Central Iowa
Quad Cities-Dubuque

Amendment provides for the Class II price in each of the above orders to be based on the Minnesota-Wisconsin price series. Previously, the Class II prices were based on average prices paid at four local manufacturing plants. In the Des Moines market only, the price was previously based on the higher of the butter-powder formula price or the average price paid at the four manufacturing plants.

Connecticut, Massachusetts-Rhode Island, and New York-New Jersey - April 1 (32 FR 5417, 3/31/67). Action eliminates the seasonal adjustment factors in the Class I pricing formulas in each of the orders. In the Massachusetts-Rhode Island and New York-New Jersey orders, the amendment establishes a seasonal incentive payment plan (Louisville Plan) under which 10 cents per hundredweight in March, 20 cents in April, and 30 cents in May and June would be withheld from payments to producers. The amount deducted would be paid back at the rate of 25 percent in August, 30 percent in September and October, and the remainder in November. Action also revises the Louisville Plan in the Connecticut order providing for the amount deducted to be 10 cents more than for Massachusetts-Rhode Island and New York-New Jersey. The "pay-back" rate would be the same. For 1967 only, the deductions for April through June would be three cents more in all three orders. The order also requires that the market administrator invest the funds deducted in interest bearing accounts during the interim.

Fort Wayne - April 1 (32 FR 5249, 3/29/67). Amendment changes the rate of "take-out" under the Louisville Plan from eight percent of the Class I price during the months of April, May, and June, to 20 cents in April and 25 cents in May and June.

Suspensions:

Inland Empire - April 1 (32 FR 6341, 4/22/67). Suspension action will enable handlers to divert producer milk from a pool plant to a nonpool plant during the months of April through July 1967 without limit. The order presently provides for diversion not in excess of 35 percent for each of the months during the period April through July.

North Texas and Oklahoma Metropolitan - April 1 (32 FR 5251, 3/29/67).

Action suspends the effect of the supply-demand adjustors to the Class I prices in these orders for the month of April 1967. The following 6 markets are similarly affected since their prices are based upon the above markets: Red River Valley, Austin-Waco, Corpus Christi, Central West Texas, Lubbock-Plainview, and San Antonio.

San Antonio - April 1 (32 FR 6835, 5/4/67). Action suspends for the months of April through June 1967 the limitation on the number of days production during a month that must be received at a pool plant as a condition for the diversion of producer milk by a cooperative association.

Upper Florida - April 1 (32 FR 6763, 5/3/67). Suspension will permit unlimited diversion of producer milk to nonpool plants during April and May 1967.

Wichita - April 22 (32 FR 6341, 4/22/67). From the effective date of this order through November 1967, action suspends all provisions of the order relating to the seasonal incentive payment plan (Louisville Plan).

Termination:

Des Moines - April 1 (32 FR 6388, 4/25/67). Action terminates the provision which required that a plant operated by a cooperative association whose members are the majority of the total number of producers shipping to pool plants of other handlers be a pool plant under the Des Moines order.
